HEALTH ATTESTATION:

I, the undersigned official veterinarian certify that:

1. The horsehair has been prepared and stored in a plant approved, validated and supervised by the Austrian veterinary authorities in accordance with Regulation (EC) No 1069/2009, the plant is also approved by General Administration of Customs of P.R China (GACC).
2. The complete retrace of this horsehair allows to confirm that there is no health risk for humans and animals.
3. The raw material which the said products are manufactured from has been dispatched directly to the approved plant in Austria under relevant conditions and requirements of the European Union veterinary legislation.
4. The horsehair has undergone the following treatments: The horsehair has been washed with 70°C all over 20 minutes and disinfected. After then it has been home-spun to ropes. Subsequent the hair has been steamed at least with 100°C for 1 hour (in case of vacuum steaming the temperature has to reach at least 90°C for 1 hour) in order to prevent any disease communicable through that product to humans or animals.
5. The washed horsehair is clean, dry, free of blood stains, faeces and skin pieces.
6. The packing material of goods are new stored in no contact with any raw material prior to export to avoid pollution, compatible with the veterinary sanitary and public hygiene requirements. Labels are affixed to the packages, indicating the product name, quantity (weight), name and approval number of the approved plant, etc.
7. Warehouse where the washed horsehair is stored meet veterinary sanitary requirements. The washed horsehair is not placed together with other product and had no contact with ground directly.
8. Effective measures are taken to avoid contamination during storage and transport procedure.
9. If transit through a third country or region, out package such as containers shall not be opened during the transit, and the seal shall be kept intact.
