

Standards for slaughter of cattle and processing of beef and beef offal eligible for export from Austria to Japan

Export Verification Program (EVP)

This Export Verification Program (EVP) provides the specified products processing requirements and requirements for facilities for the export of beef and beef offal to Japan from Austria. This EVP comes in addition to the Austrian and EU regulations but might include some relevant domestic requirements. The Veterinary Services of the Federal Republic of Austria, hereafter called “the competent authority” is responsible to overseeing the implementation of the EVP in Austria.

1 Purpose

This EVP describes the standards that slaughterhouses and processing facilities shall meet in producing beef and beef offal for export to Japan in order to meet the following objectives:

- 1.1 Ensure removal from cattle carcasses of all tissues ineligible for export to Japan;
- 1.2 Prevent cross contamination of eligible beef and beef offal for export to Japan from ineligible tissues during slaughter and/or processing;
- 1.3 Ensure that only beef and beef offal from cattle aged 30 months or less are prepared and certified for export to Japan;
- 1.4 Enable verification of compliance with Japanese import condition relating to Bovine Spongiform Encephalopathy (BSE), in addition to Austrian and EU domestic requirements.

2 Scope

This EVP applies to Austrian facilities producing beef and beef offal for export to Japan from Austria. The facilities shall meet the specified processing requirements and requirements for facilities for beef and beef offal for export to Japan from Austria. These facilities shall be designated and listed by the competent authority in accordance with the Japanese Ministry of Health, Labour and Welfare (MHLW).

3 Identification and traceability records

- 3.1 Live cattle shall be domesticated bovine animals (*Bos taurus* or *Bos indicus*) born and raised in Austria or imported into Austria from countries eligible for export of beef and beef offal to Japan.
- 3.2 Live cattle shall be individually identified.
- 3.3 Live cattle shall be sent to slaughterhouses with individual documents recording the exact date of birth and identification information of each animal.
- 3.4 All carcasses complying with point 4.1 shall be clearly identified by obligatory labelling.
- 3.5 An identification mark (i.e. by labelling) allowing the verification that the beef and beef offal for export to Japan complies with point 4.1 is applied on all products at each level of processing.
- 3.6 Records and identification information through the process shall be sufficient to trace:
 - 3.6.1 Beef and beef offal for export to Japan to carcasses;
 - 3.6.2 Individual carcasses to individual animal;
 - 3.6.3 Individual animal to farm of origin (obligatory bovine identification system).

4 Specified Products Requirements

4.1 Beef and beef offal for export to Japan shall derive from cattle that are 30 months of age or younger at the time of slaughter.

4.2 Beef and beef offal for export to Japan shall consist exclusively of meat, offal and their products which the MHLW and the competent authority recognize as eligible for export to Japan.

4.3 Beef and beef offal for export to Japan shall not include any Specified Risk Material (SRM) as defined by the enforced Japanese regulation, that is to say beef and beef offal for export to Japan shall not include any of the following tissues:

- 4.3.1 Tonsils from all cattle;
- 4.3.2 Distal ileum (two meters from connection to caecum) from all cattle;
- 4.3.3 Spinal cord from cattle over 30 months of age;
- 4.3.4 Head (except for hygienically removed tongues, skin and cheek meat) from cattle over 30 months of age;
- 4.3.5 Vertebral column (excluding vertebrae of the tail, the spinous and transverse processes of the cervical, lumbar and thoracic vertebrae, the median sacral crest and wings of the sacrum) from cattle over 30 months of age.

4.4 Beef and beef offal for export to Japan, and the carcasses and cattle from which they are derived should be traceable according to production records.

5 Processing requirements

5.1 Beef and beef offal for export to Japan shall be processed using procedures ensuring compliance with point 4 and integrated into the facility HACCP/SSOP.

5.1.1 Beef and beef offal derives from (an) establishment(s) implementing a program based on the HACCP principles in accordance with Regulation (EC) No 852/2004.

5.2 Verification activities for age requirements as described above in point 4.1 must be conducted at the slaughter and processing levels.

5.3 Beef and beef offal for export to Japan shall be processed in a manner to ensure the hygienic removal of the SRM as described above in point 4.3. and to prevent any cross-contamination by these SRM or by any beef or beef offal NOT eligible for export to Japan.

5.4 The facility HACCP/SSOP shall include regular internal verification activities that allow to control the specified requirements of this EVP are effectively implemented and met.

6 Designated facilities for export to Japan

6.1 The designated facilities for export beef and beef offal to Japan from Austria shall be facilities (slaughterhouses, cutting plants, processing plants and cold stores) approved by the competent authority following an on-site inspection. The approval of the designated facilities is under the responsibility of the competent authority in accordance with the MHLW.

6.2 The designated facilities shall meet the specified products and processing requirements for beef and beef offal for export from Austria to Japan.

6.3 The designated facilities for export to Japan shall be listed by the competent authority. The competent authority shall provide annually to the MHLW an official listing of the designated facilities for export beef and beef offal to Japan. The competent authority will keep the MHLW informed of any

amendments as regards additions, delisting and address or activity change at the listed facilities.

6.4 The designated facilities for export beef and beef offal to Japan from Austria are responsible for the compliance with all requirements outlined in this procedure and the Austrian and EU regulations.

6.5 All necessary information to verify the enforcement of the EVP by the designated facilities shall be available to the competent authority review.

7 Export certificate

7.1 Beef and beef offal for export to Japan shall be accompanied by an export certificate issued by the competent authority when exported to Japan.

7.2 The export certificate shall include the information as required by the Food Sanitation Act of Japan.

7.3 The export certificate shall mention the following statement: "All the required conditions described in the "Austria Export Verification Program - Japan" were fulfilled".

8 Audit and import inspection of the MHLW

8.1 The MHLW may conduct on-site audits of the Austrian inspection system including visit of the competent authority, designated facilities that export beef and beef offal to Japan and relevant facilities.

8.2 If non-compliance with these standards is found as a result of the audit or the import inspection of the MHLW, the competent authority shall take appropriate measures including corrective and/or preventive action.

These requirements for beef and beef offal for export from Austria to Japan will go into effect on 29th September 2017.
